Item Name: RPR Kit

Specification:

- a) The indigenous RPR (Rapid Plasma Reagin) Kits should have manufactured under manufacturing licence issued by the State Licensing Authority under Drug & Cosmetic Act. The imported kits should have been imported under import Licence issued by the DCG (I) under the Drug & Cosmetic Act.
- b) The assay should allow for qualitative and semi quantitative determination of regain antibodies in serum or plasma for sero-diagnosis of syphilis based on flocculation principle using non treponemal antigens..
- c) The assay should be suitable to perform with either serum or plasma.
- d) They assay should have a sensitivity of 80% or more in primary syphilis and specificity of 90% or more.
- e) The assay should be calibrated to WHO reference serum and the same should be supported by statements in kit insert and certificate from manufacturer. The test should be able to yield results within 20 minutes.
- f) The pack size of RPR test kit should be less than or equal to 50 tests per kit.
- g) They assay components should include positive and negative serum controls sufficient for conducting 20% of the tests (10% negative and 10% positive controls).
- h) The kit should have all essential accessories required for the test such as cards, droppers, applicators etc. in adequate quantities for the number of tests to be performed.
- i) The kit should have more than 60% residual shelf-life or 12 months (which ever is more) at the time of dispatch to the consignee.
- j) The kit should have a storage temperature of 2°C to 8°C and supplier/local agent should have the facility to store kits at 2°C to 8°C.
- k) Cumulative time temperature indicator should be part of the kit and the indicator technology used should be prequalified by WHO.
- l) Literature, detailing the components, methodologies, validity criteria,
- m) performance characteristics, storage conditions, manufacturing and expiry dates should be provided with each kit.

Item Name: RPR Kit

Specification:

- a) The indigenous RPR (Rapid Plasma Reagin) Kits should have manufactured under manufacturing licence issued by the State Licensing Authority under Drug & Cosmetic Act. The imported kits should have been imported under import Licence issued by the DCG (I) under the Drug & Cosmetic Act.
- b) The assay should allow for qualitative and semi quantitative determination of regain antibodies in serum or plasma for sero-diagnosis of syphilis based on flocculation principle using non treponemal antigens..
- c) The assay should be suitable to perform with either serum or plasma.
- d) They assay should have a sensitivity of 80% or more in primary syphilis and specificity of 90% or more.
- e) The assay should be calibrated to WHO reference serum and the same should be supported by statements in kit insert and certificate from manufacturer. The test should be able to yield results within 20 minutes.
- f) The pack size of RPR test kit should be less than or equal to 50 tests per kit.
- g) They assay components should include positive and negative serum controls sufficient for conducting 20% of the tests (10% negative and 10% positive controls).
- h) The kit should have all essential accessories required for the test such as cards, droppers, applicators etc. in adequate quantities for the number of tests to be performed.
- i) The kit should have more than 60% residual shelf-life or 12 months (which ever is more) at the time of dispatch to the consignee.
- j) The kit should have a storage temperature of 2°C to 8°C and supplier/local agent should have the facility to store kits at 2°C to 8°C.
- k) Cumulative time temperature indicator should be part of the kit and the indicator technology used should be prequalified by WHO.
- l) Literature, detailing the components, methodologies, validity criteria,
- m) performance characteristics, storage conditions, manufacturing and expiry dates should be provided with each kit.
