## Technical Specification :

0-8°C lined refrigerator Type: HBC-200/70

\*Purpose and Summarize

This freezer is designed for epidemic prevention services of vaccines, Pharmaceuticals and blood.

\*Specialties

Temperature control

Application of mechanical controller and digital temperature display, ensuring cabinet temperature in 0°C- +8°C (the lowest temperature can reach -25°C). And we also offer the ice-lined refrigerator with a knob changing freezer and refrigerator.

Cooling System and Ergonomic Design

High efficient Danfoss Compressor for swift cooling performance using CFC - free refrigerant with fan to cool down the compressor. And it is protected with special compound against rust formation with steel tubes

The container walls are lined with plastics boxes (0.4 liter) filled with water. When the unit is in operation, this water forms on and ice lining serving as an ice pack in the event of a power cut.

Foamed - in skin condenser saves energy, prevent corrosion and no cleaning necessary. Foamed - in freezing coils with in" evaporator" in contact with Ice - packs (49 qty. for HBC-200 and 25 qty for HBC 70) of 0.4L to all around the cabinet, 100mm Polyurethane foam and dual liner free from ice pack in between, ensuring that the cabinet temperature hold over more than 20 hours when the power is cut down.

Control panel situated at the front of the unit. With knob for thermostat adjusting temperature inside cabinet and temperature digital display can indicate the actual temperature of cabinet. Also there is a green light can indicate the power-on condition.

Strict tests have been carried out by competent quality accreditation organizations for daytime and high temperature alteration, temperature preservation with power supply interruption in accordance with WHO acceptance criteria. Safety looks to prevent accidental access.
